

CO2 Laser Maintenance Schedule

Rev. 2

To be signed regularly by whomever undertakes scheduled maintenance.

Maintenance Year
Example: 2025

Daily	To be completed at the beginning of each shift.
Clean all mirrors & the lens (we recommend using a specific lens cleaning solution)	
Clean the knife bed/ honeycomb bed & remove debris from the cutting area.	
Keep the general machine surface clean.	

Weekly	To be completed at the beginning of each week.
Complete all daily maintenance tasks.	
Wipe down & re-grease the guide rails.	
Thoroughly clean the machine & remove any residues.	
Check the functionality & water level of the chiller.	

Monthly	To be completed at the end of the month.
Complete all weekly maintenance tasks.	
Grease all linear bearing cars & clean and lubricate rotary bearings where accessible.	
Check alignment of the laser tube & the laser path through the mirrors & lens.	
Check the chiller pipework & extract hosing for any damage or leaks.	
Check the tension of belts and chains & ensure there is no slipping.	

Annual	To be completed annually.
Turn off power & vacuum debris in the electrical cabinet.	
Clean all accessories, including air compressor filter.	
Change & refill the chiller water.	
Check the integrity of belts & bearings on transmission & replace if necessary.	
Ensure the bed is parallel to the machine's bridge.
